

Résumé

Muhammed Sahil Arayakandy

Evidence of Ability

Apple Featured App Developer

Designed and developed the [TimeWave: Timer Chains](https://timewave.webflow.io/) app for Mac, iPad, iPhone & Apple Watch which was featured by Apple, MacStories, Techcrunch, iDownloadBlog and others for its design, simplicity and OS Integration features like Interactive Widgets, Live Activities, Siri, Shortcuts, etc.

<https://timewave.webflow.io/>

Two time Apple WWDC Swift Student Challenge Winner (2020, 2021)

My submissions [K Nearest Neighbours Classifier](#) (2020) and [Generic Decision Tree Classifier](#) (2021) were selected by **Apple** as part of [350 winning submissions](#) from around the world for "Technical Accomplishment", "Creativity of Ideas" and "Content of Written Responses".

Self-Taught programming using Apple Everyone Can Code Program

Taught myself the **Swift** Programming Language, **SwiftUI** Framework and **Xcode** with Apple's Everyone Can Code curriculum and Stanford's CS193p course. Other skills include **HTML/CSS/ Javascript, React JS, C# DotNet, Python, Webflow** and **Figma**.

Work Experience

- **Finance & Technology Lead**

Shoba Group, Bangalore - (March, 2023 - Current)

Duties include various Finance, Technology and Operations roles including web development, digital marketing, finance & accounting opera etc.

- **Lead iOS Engineer**

Edvora Pvt Ltd, Delhi NCR - (July, 2022 - February, 2023)

Lead the iOS Engineering Team at Edvora, reporting directly to the CTO and Leadership Team. In my Position as Lead Engineer, I worked on System Architecture, Performance, Refactoring, etc as well as managing the iOS team.

- **iOS Engineer**

Edvora Pvt Ltd, Delhi NCR - (July, 2022 - February, 2023)

My Internship lasted for about 2 months after which I was promoted to Full-Time Engineer on the iOS Team at Edvora. Worked on a lot of features including iOS version of their real-time video meeting platform Edvora Meet, Real-Time Chat, iOS Native Screen Sharing, etc.

- **iOS Intern**

Edvora Pvt Ltd, Delhi NCR - (July, 2022 - February, 2023)

I worked on the iOS App for Edvora for both iPad and iPhone. Tasks including fixing bugs, creating new UI from scratch, adding documentation, etc.

- **Indie Developer**

TimeWave App, Worldwide - (August, 2020 - current)

Built a productivity tool app for Mac, iPad, iPhone & Apple Watch. Undertook all aspects related to design, engineering, sales, marketing, customer support, PR, etc as an indie developer. Featured by Apple in various lists on the App Store like 'Great apps updated for iOS 26', 'Try a clear look for App Icons & Widgets' and 'Mighty apps from small teams'.

Projects:

TimeWave: Timer Chains: <https://apps.apple.com/app/id1524345488>

Build Sequential Timers for all your tasks including focus timers, workouts, cooking, etc. Available on the App Store for Mac, iPad, iPhone & Apple Watch. Built with SwiftUI, CoreData / CloudKit & RevenueCat.

KNN (K Nearest Neighbour) Classifier: <https://github.com/mdsahilak/DecisionTreeClassifier>

Implementing a KNearestNeighbour Classifier in Swift and comparing it with a python equivalent. One of the winning submissions for Apple Swift Student Challenge - 2020.

Decision Tree Classifier: <https://github.com/mdsahilak/DecisionTreeClassifier>

Converting a decision tree python to swift that is not restricted to one data type using Swift's advanced generics features. One of the winning submissions for Apple Swift Student Challenge - 2021.

TFL_v1 & TFL_v2: https://github.com/mdsahilak/TFL_v1 & https://github.com/mdsahilak/TFL_v2

These are 2 Swift Command Line applications for finding the shortest route between two tube stations on the London Tube Network using Dijkstra's Algorithm. v1 uses an Array based Priority Queue and v2 uses a Heap based Priority Queue. We measure the performance of both apps for the same route to understand the difference in performance between both data structures.

Cloud Kitchen: https://github.com/mdsahilak/cloud_kitchen_ui

A Full Stack web app for a cloud kitchen built with React JS for the Frontend hosted on Vercel & C# Dotnet for the Backend REST API hosted on Microsoft Azure with AzureSQL as the Database.

Selfish Round Robin in Bash: https://github.com/mdsahilak/SRR_Algorithm

Implementing the Selfish Round Robin OS Process Scheduling Algorithm as a bash script.

Shoba Hotels Landing Page: <https://www.shobahotels.com>

Landing page for a hotel chain built with Webflow along with integration for third-party services like Mailchimp, Airtable & Axis Rooms.

Education

Master of Science - Software Engineering

University of Westminster, London - (2023 - 2024)

Bachelor of Management Studies - Digital Business

Jain University (Hetic India) - (2019 - 2022)

CBSE 12th Grade - Commerce

Delhi Public School Bangalore North - (2016 - 2018)
